<u>Overview</u>

The Odoo HRIS Attendance System, integrated with ZKTeco biometric devices, offers a professional and efficient solution for managing employee attendance. This module extends Odoo's native HR functionalities by automating attendance data capture directly from biometric terminals, eliminating manual processes and significantly reducing errors. This seamless integration ensures real-time and accurate attendance records, which are crucial for precise payroll processing and adherence to compliance standards.

The core of this integration lies in its streamlined data flow. Attendance logs from ZKTeco devices are automatically synchronized with the Odoo HRIS. This automated transfer removes the need for manual data entry, saving considerable time for HR teams and ensuring that all attendance information within Odoo is consistently up-to-date.

Within Odoo, the HRIS Attendance System provides robust functionalities for analysis and management. HR personnel can generate a variety of reports, including detailed insights into daily attendance, instances of late arrival or early departure, and overtime. This comprehensive data supports informed workforce management decisions and ensures the consistent application of company attendance policies.

Ultimately, this integrated system delivers a reliable and efficient attendance management solution. By leveraging Odoo's flexible architecture and dedicated connectors, it establishes a secure communication channel with ZKTeco devices, ensuring data integrity and system stability. This makes it an invaluable tool for organizations seeking to optimize their attendance processes through advanced biometric technology.

<u>Features</u>

HRIS Attendance System

1. Customised Payroll Calendar :

Creating a customised payroll calendar from the list/calendar view based on your needs which will immediately allocated to the employee according to the department chosen.

2. Bulk Calendar Activation :

When there is need of activating multiple calendars for multiple employees this feature does the job well. Here we can choose the list of calendars based on the date ranges we have selected and get those calendars active in the employees based on the department is selected.

3. Bulk Calendar Deactivation :

Similarly, When there is need of deactivating multiple calendars for multiple employees this feature does the job well.

4. Dynamically Configured Bio-metric Attendance System:

Here, there is use of ZKteco bio-metric attendance app which seamlessly integrates the bio-metric machine and the odoo. By using, this app the data in the bio-metric machine will be easily fetched in odoo and then can be analysed using reports and graphs. And furthermore the payroll can also be implemented based on the attendance fetched.

Flow:

Step -1 : Creation of Employee and it's Contract.

→ The first thing to start with HRIS system is to create an employee to log it's attendance and implement payroll. After creating employee create the contract for that employee.

→ To create Employees/Contracts either we can create manually or else we can also import the xls file to automatically create the records based on the records we have in the xls file.

1. By Importing

→ First navigate to the **Employee** app

→ Click on the gear icon to get the **Import records** option and then click on the Import records button to get the below view

→ Here we can import both types of files Excel and CSV, and for that if there is need of template then we can click the **Import Template for Employees** button to get the template which we can import in odoo easily.

→ Once the template or the file is ready to import we can click the **Upload File** button and select the file from the system to import

Lengloyees Employees Depar	tments Reporting Config	guration		• •	p (୭ 🗗	A]
Import Test Load File Cancel	Employees Import a File

	Department Sales	To import, sele 🔹					
	Gender	The Conder Mark					

→ As we select the file and import it, it will show us the fields to import which are there in the Excel or CSV file, now click the **Test** button to test if there is appropriate data in the file which matches the type of the field and if it says that "Everything seems valid" then we click the **Import** button to import all the records in the odoo which are there in the file.

→ And if want to create the employees manually then hit the **New** button in the employee view and create the employees.

Work Entry Source ?	O Working Schedule	2				
	Attendances					
Salary Information	Contract Details					
Wage Type Hou	irly Wage					
Schedule Pay Dail	у					
Hourly Wage ? \$20	.00	/ hour				

→ Enter the details as shown in the screenshot and click the **Save** button to create the contract of that employee from the same screen

 \rightarrow Also, we can create Contract by navigating to the Employees \rightarrow Contracts menu to create a new contract for any employee by clicking the **New** button and also we can import the records of the contract in the same way we did for the employees .

→ Once, the employee's contract is created, change the contract's status to **Running** by clicking on the running state.

Step - 2 : Create Calendars

→ To create calendars first we need to navigate to the **Calendars** app, in that go to the **Payroll Calendar** menu.

→ Here the calendar view is open, we can create here a single or bulk calendars according to the need.

3	Calendar Calend	ar Payroll calendar Bull	Calendar Activation Bulk	Calendar Deactivation Co	nfiguration

 \rightarrow After adding the details in calendar click **Confirm** and then **Save & Close** button.

→ To create calendars we have few other ways too, we can create a new record manually or else we can also import bulk calendars according to the need.

→ To create new calendar manually go to the list view and click the **New** button.

				3		_	A
SAT 5	July	y 20	25			<	>
	s	м	т	w	т	F	s
	29	30	1	2	3	4	5
	6	7	8	9	10	11	12
12	13	14	15	16	17	18	19
	20	21	22	23	24	25	26
	27	28	29	30	31	1	2
	3	4	5	б	7	8	9
40							

→ Here we can also import the records of the calendars as we did same of the employee.

 \rightarrow The template to import the record of payroll calendar is given below in the link

https://docs.google.com/spreadsheets/d/11UhQqW_VUjlbWPrxlwV_ZcVoEc2_0Ub/edit? usp=drive_link&ouid=109858457488067729079&rtpof=true&sd=true → Here once the calendars are created, then they will automatically get set in the **Employee** → **Payroll Calendar's** tab based on the department selected in the Calendars.

→ Now, these calendars will only work once they are activated, and to active the calendars we can either do it manually by navigating to employee or else we can use the **Bulk Calendar Activation** feature which is there in the **Calendar** menu.

→ Here we can also view the calendars which are created in the calendar view based on the departments.

Step - 3 : ZKTeco Configuration

→ To configure ZKTeco device with the odoo , we first need to configure the ip, domain name and other things in the machine.

 \rightarrow So first need to go to **COMM**. \rightarrow **Ethernet** :

• Enable DHCP : **ON**

→ Other all the things should be configured automatically as it will fetch those things directly from the connected Router.

 \rightarrow Now go to the COMM. \rightarrow Cloud Server Setting :

- Enable Domain Name : **ON**
- Enable Proxy Server : OFF
- Domain Name : (Enter the domain of the server that is need to be configured)

→ Once all these things are configured then we need to go to Odoo screen to configure the Bio-metric device in odoo

→ Go the **Attendance** app

<mark>4</mark> Attendances	Biometric Attendance Log	Overview	Kiosk Mode	Reporting	Manager	Biometric Device Config	Configuration

 \rightarrow In the attendance the active calendars will be automatically fetched based on the employee selected

→ The Actual check-in time shows the time when the check-in is actually done and the Check-in time shows the time of the active calendar.

→ Also, the attendance can be imported in the same way as the employees.

→ Once the employee does check-out the split attendance lines will be created under the **Calendar Information** section which is created based on the active calendars that employee has and also depends on the check-in & check-out time of that employee.

→ The split attendance lines also includes the break hours which can be configured in the calendars, these break hours won't be calculated in the paylsip and sale order of that employee.

Step - 5 : Project & Task

→ Here we will now create **Project** and **Task** of a particular employee and also link the sale order for that project and tasks.

→ Navigate to the **Project** menu and click the **New** button so that the below pop-up will show up

→ Click the **Create project** button to create a project and then create a **New** stage in that task.

< Project	Projects	Tasks	Reporting
Tasks 🏟			
New			Add
See examples			

 \rightarrow Click the **Add** button to add a New stage in the **Attendance** project.

< Project	Projects	Tasks	Reporting
New Tasks	٠		
New			+

→ Click the **New** button to create a New task in that stage of the project.

 \rightarrow To confirm the sale order first enter a service type product in the sale order line and enter the start date and end date in the sale order.

 \rightarrow Once the sale order is confirmed the sale order lines will show the calculation for the employees which are there in the project and the calculations is based on the split attendance lines.

→ To make the pdf of the sale order click on **gear icon** → **print** → **PDF Quote**

Step - 6 : Payroll Implementation

→ To implement the payroll and create payslips need to navigate to the **Payroll** app.

 \rightarrow To create a new payslip we have few ways to do so.

 \rightarrow We can either import the records or else we can create the payslips manually.

Payroll	Dashboard	Со	ntracts	Work Ent	ries		
New Empl	oyee Payslip	s 🕻	5				
			🛓 Import records				
Reference		🏝 Export All					
None (3)							
			■ Spreadshe				

→ When creating a new payslip choose the employee for whom the payslip is needed to be created

Payroll Dashboa	d Contracts Work Entri	es Payslips	Reporting Configur	ation

 \rightarrow From here, you can update the SSS deduction ranges in case your government revises the deduction norms.

These deductions are automatically calculated during salary processing based on the applicable salary range.

PAC	IBIG deductio	n 🌣				1-2/2 < >
Q	Search					•
	Range From	Range To	Employee Percen	Employer Percen	Employee Maxim	Employer Maxim
	1.00	1,500.00	0.01	0.02	15.00	30.00
	1,501.00	10,000.00	0.02	0.02	200.00	200.00

Like SSS deduction you can also set up for PAGIBIG deduction.

These Deductions are added

\rightarrow Also, in the **Accounting menu** \rightarrow **Reporting menu** \rightarrow **Billing Report**

→ This report is the full fledged report of employees and their work hours, basic pay, deductions, shifts, etc.
